

METEOR has achieved many years of experience by offering a wide range of motorized solutions developed thanks to synergy and ongoing cooperation with main leading players in this field.

METEOR has designed reliable motorized solutions, customized upon specific requirements and with very low competitive costs as the result of highly industrialized productive and testing processes, all realized internally.

Range of products:

956 TYPE GEAR MOTORS

Compact 956 synchronic motor-reducer with high performances. Available with a wide power supply, voltage range and with different electrical connections: wired, faston, RAST connector.

Power input	W	3-8
Torque	Ncm	400 - 10
Speeds	Rpm	1,2 - 50

912 TYPE GEAR MOTORS

Oval shape synchronous gear motor with high performances. Available with a wide power supply, voltage range and with different electrical connections: wired, RAST connector.

Power input	W	5
Torque	Ncm	600 - 30
Speeds	Rpm	0,8 - 20

DC MOTORS

Compact DC Motor 12-24V, with high reliability and available with a wide range of configurations.

Power input	W	1,5 - 5
Torque	Ncm	210 - 8
Speeds	Rpm	10 - 250

977 MOTORS

Synchronic motor-reducer with high performances and fast RAST connection or faston; it doesn't need any assistance (capacitor) for starting.

Power input	W	4-12
Torque	Ncm	500 - 30
Speeds	Rpm	3 - 50

MX4 MOTORS

Synchronous or stepper motors. The best solution for applications requiring very high precision in angular positioning and rotation speeds.

	SYNCHRONOUS 230v	STEPPER 24 V AC
Power input	11W	7W
Torque	200 Ncm (9rpm)	130 Ncm (3 rpm)
Speeds	9 - 237 rpm (dx a sx)	0-9 rpm 0-237 rpm (piloted)

Our supplies are characterized by:

- high product reliability;
- flexibility and timeliness to meet customer's requirements;
- competitive costs as the result of continuous improvement of productive efficiency.
