

ROTISSERIE KIT

DESCRIPTION

METEOR developed motorized cooking solutions, offering a range of options from the most economical to the most sophisticated one.

The **COOKING KIT FAMILY** includes spit rods, flange systems and skewers for traditional spit cooking, flat and return grills for spit cooking, and rotating baskets for oil-free cooking of moving food in household ovens. These are available in various sizes and profiles to meet space constraints and customer functionality requirements.

All kits are supplied with our gear motors, along with other customizable accessories and KEBAB systems. Lamp holders are electrical power supply devices and are available in different types.
